ABOUT ME

ISTQB Certified Software QA Engineer with 3+ years of experience in QA automation, functional, API, mobile, database, and AI/LLM testing. Currently leading a 20-member QA team, driving test planning, execution, defect management, and release readiness. Experienced with Selenium, Playwright, Python, Java, Cucumber BDD, REST Assured, Postman, Appium, SQL, and JIRA. Experienced in AI/LLM validation and human-in-the-loop evaluation, with 1,800+ test cases authored and executed.

TECHNICAL SKILLS

- **Automation**: Selenium WebDriver, Playwright, Pytest, Appium, TestNG, Cucumber (BDD), REST Assured, Postman
- **Programming & Database**: Java, Python, C, SQL
- **Testing**: Functional, Regression, Integration, End-to-End, Smoke, Sanity, Exploratory, i18n, Accessibility
- **AI/LLM:** AI/LLM Feature Validation, AI Response Validation, Human-in-the-Loop Evaluation
- **Tools & Methodologies**: JIRA, Agile/Scrum, Test Strategy & Planning, Defect Management, Test Execution & Reporting

EXPERIENCE

Senior Software Engineer L1 **|** *Hexaware Technologies Ltd* **| *Aug 2023 – Present***

- Lead a 20-member QA team across web and mobile testing, managing test planning, execution, defect triage, stakeholder communication, and release readiness.
- Perform functional, regression, integration, end-to-end, exploratory, i18n, accessibility, smoke, and sanity testing across web and mobile applications.
- Develop and execute UI automation using Selenium WebDriver, TestNG, Playwright, Python, and Pytest for functional and regression testing.
- Develop BDD automation using Cucumber, including feature files, step definitions, and Selenium WebDriver integration.
- Execute API testing using Postman and REST Assured, validating requests, responses, status codes, and functional scenarios.
- Perform SQL-based database validation to identify missing, duplicate, and inconsistent data.
- Validate AI/LLM-powered features, including Llama-based experiences, using structured scenarios, response validation, consistency testing, and human-in-the-loop evaluation.
- Manage requirements, test design, defect lifecycle, stakeholder communication, and release validation using JIRA.

Key Achievements:

- Authored and executed 1,800+ test cases across functional, regression, exploratory, mobile, and AI/LLM feature validation.

- Previously served as POC for 11 QA engineers, coordinating QA activities, issue resolution, and stakeholder communication.
- Recognized as Rockstar of the Month (July 2024) and Dashing Debutant.
- Developed automated daily, weekly, and monthly QA reporting, reducing manual reporting effort by 15+ hours per week and improving test execution visibility and stakeholder reporting.

Key Projects

AI-Powered Web & Mobile Platform | Client Project

- Performed functional, regression, and end-to-end testing of AI-powered features across web and mobile platforms.
- Validated AI-powered experiences across Muse, Meta AI, Instagram, Messenger, and WhatsApp.
- Conducted structured AI/LLM validation and human-in-the-loop evaluation to assess feature behavior, response quality, and consistency.
- Developed UI automation using Playwright, Python, and Pytest and performed API validation using Postman and REST Assured.

BDD Automation & Data Validation | Internal Project

- Developed Cucumber BDD automation using Selenium WebDriver, including feature files and step definitions.
- Performed SQL/source-to-target validation to verify data accuracy, completeness, and consistency.

EDUCATION

- Master of Business Administration (Business Analytics) - Vignan University, AP | Expected 2027 | CGPA: 9.2/10
- Bachelor of Technology (ECE) - Lendi Institute of Engineering and Technology, AP | 2023 | CGPA: 8.35/10

CERTIFICATIONS

- **ISTQB:** Advanced Level Test Management (CTAL-TM), AI Testing (CT-AI), Foundation (CTFL)
- STEP from The Hindu Group – English Certificate (4th October 2021)
